

## Doublesided vacuum lifter LISEC LAS-8

Stable lifting bridge with suction pads that can engage both sides of a glass sheet.

Used in conjunction with a crane system, this device can handle heavy glass sheets and units.

The 8 section pads are mounted on tiltable arms in pairs facing each other. The suction pads are pressed flat onto the glass sheet pneumatically via a lever in the tiltable arms, this gives a quick engagement.

With suction heads on both sides even freshly sealed glass units do not slide apart, even if carried for some time.

### Special Features:

- Problem free handling of thick items, there is an 80 mm opening between suction pads
- Max. glass size up to 5000 x 3000 mm
- Max. Load up to 1000 kg
